AIA Provider #: 404108764

AIA Program #: ADCES101

Length: 1.0 hours = 1.0 LU hours

HSW: Yes

Accurate Dorwin Fiberglass Windows —this course is designed to educate the attendees on the sustainability and durability of fiberglass as an alternative to other window framing materials. At the end of the course, attendees will:

1. Understand and identify the components of fiberglass, how it is made, and why fiberglass is sustainable and is a healthy building choice
2. Understand how fiberglass is better suited for window frames compared to other materials available on the market
3. Understand the strength and durability of fiberglass pultrusions compared to aluminum and vinyl extrusions
4. Understand how fiberglass windows are assembled, what options are available, and how they perform thermally and structurally.

Presenter: Russell Harrison, Accurate Dorwin Representative, Window Tech Inc.
