

The American Institute of Architects Continuing Education System

AIA/CES Registered Provider Program Summary

Program Title: Daylighting Using Skylights and Translucent Curtainwall

Program Number: 0D2003

LU Hours: 1.00

Sustainable Design LU: Yes

HSW: Yes

Description:

- (1) How to use skylights correctly for optimum daylighting performance.
- (2) Help architects and specifiers understand the design limitations of the major glazing options.
- (3) Overview of the basic structural requirements for code-compliant skylights.
- (4) Summarize the economic and productivity advantages associated with the energy-efficient use of daylighting.
- (5) Controlling excessive solar heat gain with translucent glazing panels.

Dates and Locations: (On-going by appointment) General Area or Multiple Locations, United States

Cost: No Charge

Target Audience: Architects, designers, specifiers, facility managers, code officials and other members associated with the construction industry. The information provided is aimed at professionals involved in designing Commercial, Education, Healthcare, Hospitality, Retail and Government facilities - all of which can benefit from properly designed daylighting systems.

Method of Delivery: The presenter will utilize a PowerPoint slide presentation and related program handouts. Participants are encouraged to ask questions either during the presentation or at the conclusion of the program. Food will be provided for lunchtime presentations.

Facilitator Qualifications: All Major Industries, Inc. Representatives have been trained in CES guidelines and have strong presentation skills. Our Representatives also possess years of experience in the architectural building industry, allowing them to add further insight to the program.

A/V Needed: The presenter will require electrical power, a projector, and a screen for the PowerPoint slide presentation. (The presenter will supply their own laptop.)

ENERGY-SAVING
SKYLIGHTS &
TRANSLUCENT CURTAINWALL
