

Light Interference Color Stainless Steel

Provider: Millennium Forms

AIA Provider #: 40408846

AIA Program #: AIAMF1024

Length: 1.0 hours = 1.0 LU hours

HSW: No

Millennium Forms Stainless Steel —this course is designed to educate the attendees on stainless steel for cladding and the electrochemical process of stainless steel known as light interference color or LIC. At the end of the course, attendees will:

1. Understand and identify the evolution of metals in cladding for construction and architecture.
2. Understand LIC and the process in which it is created.
3. Understand the applications and limitations of LIC.
4. Understand LIC characteristics and the effects of viewing angles, light conditions, and material finish on color.

Presenter: Russell Harrison, Millennium Forms representative, Window Tech Inc.
